WORK EXPERIENCE:

Administrative Assistant – Walmart, Guelph

10/2021 - present

My primary responsibility is to deliver efficient and organized support, contributing to the seamless operation of the organization and designated department.

- Diligently managing and organizing documents independently, ensuring accuracy, and maintaining confidentiality.
- Contributed to the planning, design, and deployment of enhancements to existing applications which eventually improved UI interface and increased in usage of new application by 5%.
- Completing paperwork, packing, and shipping the merchandise properly makes 99% score in processing returns.
- Debugged and troubleshooted software issues, identifying and resolving defects or errors to enhance system performance.
- Coordinated with other team members and departments to ensure timely completion of tasks maintaing score above 90%.
- Assisting in the onboarding and training of new team members, contributing to a smooth integration into the organization.
- Communicate with customers, suppliers, and organization employees to exchange information that results in building long lasting professional relations.

WhiteLion Infosystem - Surat, India

07/2020 – 08/2021

Responsible for developing and maintaining client-based web projects mainly focused on backend side using the MVC framework.

- Design and implemented a complete web application in Node.JS as a backend tool, react as a frontend tool and mongoDB as a database to store our data in unstructured formed that streamlined choice of choosing educational institute of abroad.
 - Worked directly with a client on freelance to Integrate him the Web Admin Panel with interactive website.
 - Developed and structure the backend web services using Node.Js framework of an android application that was based on mathematical tool (Abacus).
 - Developed a backend code and a webpage for a mobile application based on farm dairy products. Basically, I was assigned to develop a code that helped the user to order its dairy products directly from the farms and provide some advanced features like day-to-day subscription order, variety of payment options.
 - Building this above large-scale project has given me better insight into complicated software systems and helped me build more effective units of code as functions.
 - Involved in code reviews using [GitHub](#) pull requests, reducing bugs, improving code quality, and increasing knowledge sharing.
-
